4.5 Angles: Writing Proof

Geometry Regents 2013-2014 Ms. Lomac

SLO: I can write proofs about angles.

(1) Exterior angle theorem: Proof by constructing a parallel line.

(a) The exterior angle theorem states that

$m\angle z = m\angle \underline{\hspace{1cm}} + m\angle \underline{\hspace{1cm}}$

(b) Rotate $\angle B$ 180° around the midpoint of \overline{AB} .

(c) $m\angle B = x$, so $m\angle B' = \underline{\hspace{1cm}}$ because _____

(d) $m\angle B'AC = \underline{\hspace{1cm}} + \underline{\hspace{1cm}}$ because _____

(e) $\overline{C'A}$ is _____ to \overline{BC} because _____

(f) $m\angle B'AC = m\angle ACD$ because _____

(g) $x + y = z$ because _____

(2) Exterior angle theorem: Proof by angle relationship & algebra

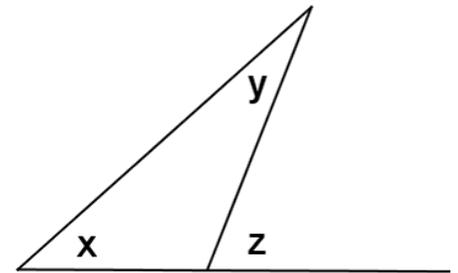

(a) Add a w to the empty angle in the diagram

(b) $x + y + w = 180$ because _____

(c) $z + w = 180$ because _____

(d) $x + y + w = z + w$ because _____

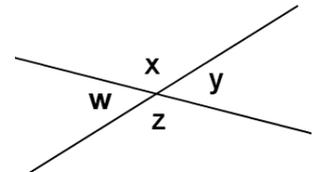

(e) $x + y = z$ because _____

(3) When writing proofs, you can rely on **facts** that you know – facts about **angle relationships, transformations, parallel lines**. You can add **auxiliary lines** or **letters** to angles or points of intersection. You can construct to help you see relationships you might use in a proof. As you work through each proof in 4.5, refer to the notes pages on this activity and on activity 4.2. Prove each statement below. (you may not need all of the lines provided for you) Do 6 of the 10 problems.

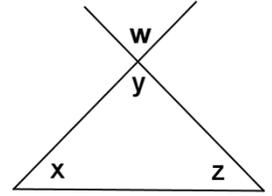

(a) PROVE: *Vertical angles are equal.* (suggestion: 2 linear pairs, substitution, and inverse operations)

_____ and _____ are vertical angles
 _____ because _____
 _____ because _____

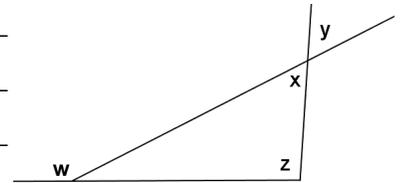

(b) PROVE: $m\angle w + m\angle x + m\angle z = 180^\circ$ (suggestions: vertical angles, triangle sum, substitution)

_____ because _____
 _____ because _____

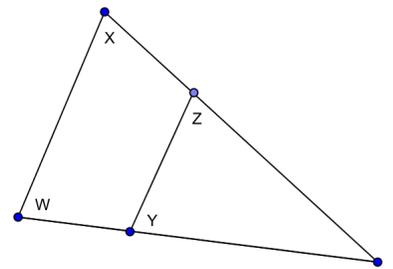

(c) PROVE: $m\angle w = m\angle y + m\angle z$ (suggestions: vertical angles, exterior angle theorem, substitution)

_____ because _____
 _____ because _____

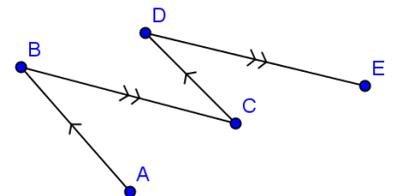

(d) PROVE: $m\angle y + m\angle z = m\angle w + m\angle x$ (suggestions: add a letter, triangle sum, substitution)

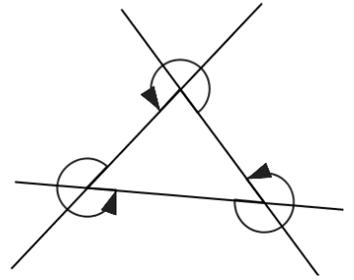

_____ because _____
 _____ because _____

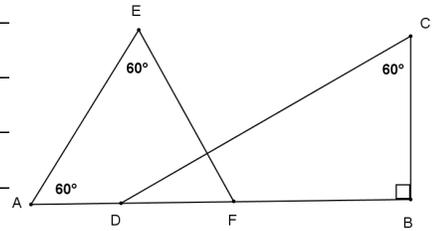

(e) PROVE: $\angle ABC = \angle CDE$ (suggestions: note the pairs of parallel lines)

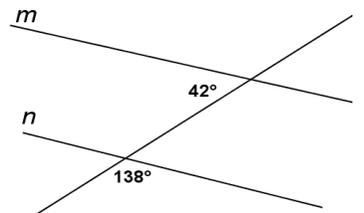

(f) PROVE: *the sum of the marked angles is 900°* (suggestions: add labels, triangle 180° , angles at a point)

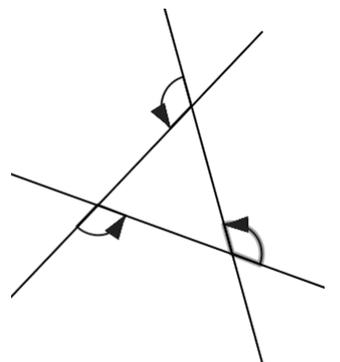

(g) PROVE: $\overline{DC} \perp \overline{EF}$ (suggestions: \perp means perpendicular means 90° , add letters, triangle 180°)

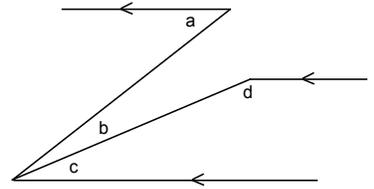

(h) PROVE: $m \parallel n$ (suggestions: add letters, corresp., linear pair, alt. int., vert., alt. ext., same side ext.)

(i) PROVE: *the sum of the marked angles is 360°* (suggestions: add letters, linear pair, triangle sum)

□ (j) PROVE: $\angle a + \angle d - \angle b = 180$ (suggestions: alt. int., same side int.,)

4.5 ANGLES NOTES PAGE 2

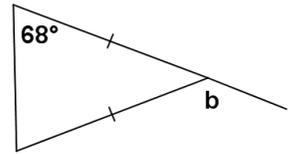

Diagram	Name	Description
	Equation	
	Equation	
	Equation	
<p>Diagram</p> $x + y = z$ $a + b = z$ <p>therefore $x + y = a + b$</p>	Equation	
<p>Diagram</p> $x + y = z$ $\begin{array}{r} -y \quad -y \\ \hline x = z - y \end{array}$ <p>OR with division, mult., add., square root, etc.</p>	Equation	

4.4 Exit Ticket Name _____ Per _____

Find the measure of angle b.

_____ because _____
_____ because _____

- 😎 I got this! 🏆
- 😊 I can with a bit of help 🧑🏫
- 😐 I will, given lots of help 🧑🏫
- 😞 I can't 🙅
- 😡 I won't bother to 🙅
- 🙄 I refuse to 🙅
